

# Streamline revenue management with a single integrated solution

With billing and revenue recognition combined in a single solution, simplify your revenue management by assigning high volume financial transactions and executing revenue recognition in real-time as events happen.

- Support for all patterns of revenue recognition under ASC 606/IFRS 15
- Automated revenue allocations based on standalone selling-price (SSP)
- Establish custom rules by currency, geography, entity
- Intercompany allocations
- Revenue splits - single charges recorded against multiple GL accounts
- Dual reporting for different accounting standards (IFRS vs US GAAP)
- and more...

### Why it matters

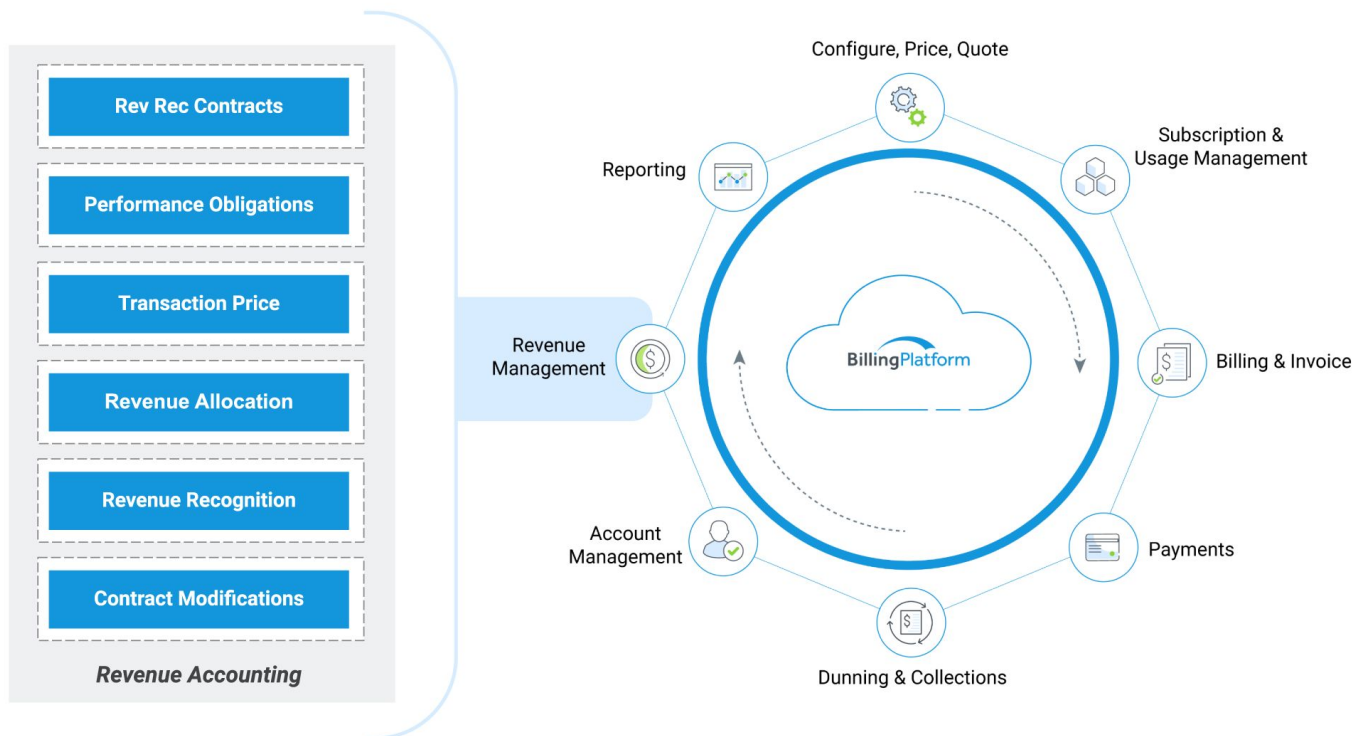

As a business with recurring revenue, it's important that you measure, record, and report revenue accurately and according to accounting standards.

### Why it's important to get it right

Accurate and timely revenue reporting not only demonstrates the health of your business to financial institutions and investors, it also helps with making strategic decisions for your company.

### Why an integrated solution is important

With a flexible and powerful rule-based engine you can automate the entire billing and revenue recognition process and seamlessly integrate with your ERP.

## The Only Unified Billing & Revenue Recognition Solution Built on a Modern Cloud-based Platform for Enterprise-Grade Revenue Management

With BillingPlatform, be confident that when you set up new products and revenue allocations, billing events will flow automatically to the subledger and general ledger to create auditable financial statements.
